TECHNICAL ASSISTANCE TEAM FOR EMERGENCY RESPONSE REMOVAL AND PREVENTION
EPA CONTRACT 68-01-6669

TO: Ron McCutcheon, EP&R/ENSV October 27, 1986
THRU: Russell B. Krohn, Region VII TATL *RBK* TAT-07-F-01773
FROM: Robert L. Fine, Region VII TATM TDD #07-8610-45
SUBJECT: American Steel Works Immediate Removal PCS #6045

The Region VII Technical Assistance Team assisted EP&R in the sampling and removal of PCB contaminated materials from October 7 through 17, 1986. The items had been removed from American Steel Works, Inc., located at 500 West McKissock in Holden, Missouri, and moved to 2459 Charlotte, Kansas City, Missouri, and five other private properties near Holden following shutdown of the plant. Through a warrant issued in U.S. District Court, the items moved to 2459 Charlotte were sampled and found to be PCB contaminated to unacceptable levels, and were returned to 500 West McKissock in Holden. Likewise, the materials taken to private properties around Holden were also returned to 500 West McKissock. Assisting in the removal activities were Ruben McCullers, EPA/RCRA, ERCS contractors and two of EPA's U.S. Deputy Marshals.

Attached is an inventory detailing the items returned to 500 West McKissock, Holden, Missouri. A copy of this inventory was signed over to Clean Sites, Inc. representative Jerry Hollingsworth on October 27, 1986, after concurring with its contents. Please advise if the TAT can be of any further assistance in this matter.
